

OSCAR MIGUEL LUCIANI

Frontend Developer

React Js, Next js, Vite js, Javascript, Typescript, HTML, CSS, Tailwind css.

About me

Hello! I'm a passionate web developer with experience in Frontend and Full Stack Development. I began my journey as a self-taught learner in Java and later completed a 7-month bootcamp at Digital House, where I specialized in Node.js. I then ventured into technologies like React.js, Next.js, Typescript, and MongoDB, among others. During my early projects, I worked as a Full Stack Developer, but soon discovered my passion for Frontend development. For about a year now, I've been involved in challenging projects at No Country, where I've developed both technical and soft skills. I'm seeking exciting opportunities to continue growing and learning in a collaborative and innovative environment.

Work and Professional Experience

Frontend Developer

Humanitarian Aid - Nov/Dec 2023 (App created within the framework of No Country). It was designed to manage voluntary donations in situations of natural disasters, accidents, or other adversities. The frontend was built with Next.js, Typescript, and Tailwind CSS. The backend with Asp.Net, MVC WebApi & SQL.

NearByTour - October 2023 (Project carried out within the framework of No Country). Next.js 13, Typescript, and Tailwind CSS were used on the frontend. The backend employed Next.js, JavaScript, Firebase, Cloudinary, Postman, and Algolia. UX UI utilized Figma. This app allows you to discover hidden treasures and authentic experiences, as well as contribute your discoveries to the traveler community.

Meddyplus - August 2023 (Project carried out within the framework of No Country). Vite, React.js, TypeScript, and Tailwind CSS were used on the frontend. On the backend, Node.js, TypeScript, and SQL were employed. It's an app for a Comprehensive Medicine Clinic that enables the creation of medical appointments for online consultations, online medical records, and many other functions. Very practical for both patients and doctors.

Hernandez-Cabañas - April 2023. MERN Stack project using Netlify for the frontend, Render for the backend, and MongoDB Atlas for the database. It's an app for cabin reservations and rentals.

Skills

React Js	Bootstrap	Agile Methodologies - Scrum.
Next Js	Node Js	MVC - Architecture Pattern.
Vite Js	Express Js	Postman
Javascript	Mongo DB	Sequelize
Typescript	MySQL	Trello
HTML	Git	Java
CSS	Docker	English
Tailwind CSS	API creation and consumption.	Italian (Intermediate - Conversation).

Education

Docker - Online Course - January 2024.
Next.js - Online Course - August 2023.
Tailwind CSS - Online Course - July 2023.
Bootstrap - Online Course - January 2023.
TypeScript - Online Course - January 2023.
